

Section 1

Ans 1 Outside storage of solid waste →

on site storage means the temporary collection of waste at the household level. It means important that waste is stored in proper containers the size of the containers should be sufficient to hold at least the amount of solid waste that is generated per day at household level. These could be basket preferably made from locally available materials plastic baskets or metal containers large containers or dustbins, especially those used for food waste should be leak proof have tight lids and be long lasting these. Size of your containers should be sufficient to hold the least the amount of solid waste that is generated per day at household level.
