

SECTION - 1

Q.3 ⇒ Difference between Geothermal Power Plant and Thermal

Ans ⇒ Power Plant.

Geothermal Power Plant

1. It uses inexhaustible source of energy.

2. It is more environment friendly.

3. These Power plants in some dangerous cases can cause earthquakes.

4. It is mainly used for power generations process.

5. Setup cost is high.

6. By products of these plants are not used.

7. These plants are less flexible.

8. Specified area are required.

Thermal Power Plant

It uses exhaustible source of energy.

It is less environment friendly.

There is no such problem.

It can be used for various industrial processes.

Setup cost is low.

By products of these plants can be used.

These plants are more flexible.

No such restriction.
