

around 5,200 years ago, Uruk in Southern Mesopotamia, was probably the first city the world had ever seen, housing more than 50,000 people within its six miles of wall. Uruk's agriculture made prosperous by sophisticated irrigation canals, was home to the first use of middleman trade intermediaries & cooperative trade network. Set the pattern that would endure for the next 6000 years.

Matt Ridley, Humans why they succeeded  
Wall Street Journal, May 22 2010, accessed

... theory of international  
is an extension of the general equilibrium theory  
of value. This theory has been put forward  
by Bertil Ohlin, a Swedish economist, and  
it has replaced the traditional comparative  
cost theory. which they have comparative  
advantage on the basis of factor endowments.

### Advertisements

Just as differences in individual capabilities  
are the cause of exchange between individuals  
Similarly differences in factors of production is the  
cause of international trade.

First example

- A - 20 tooth-brushes and 20 kg of sugar
- B - 15 tooth-brushes and 10 kg of sugar.

③ The modern theory of International trade is an extension of the general equilibrium theory of value. This theory has been put forward by Bertil Ohlin, a Swedish economist, and it has replaced the traditional Comparative Cost theory which they have comparative advantage on the basis of factor endowment.
