

Q-3 Short Notes on \Rightarrow SMTP.

FTP
Biometric Systems.

★ SMTP (Simple Mail Transfer Protocol)

Standards for "Simple Mail Transfer Protocol" are. This is the protocol used for sending e-mail over the internet. Your e-mail client (such as Outlook, Eudora or Mac OS X Mail) uses SMTP to send a message to the mail server, and the mail server uses SMTP to relay that message to the correct receiving mail server.

★ FTP (File Transfer Protocol)

FTP (File Transfer Protocol) is a standard method for moving files across the internet. Standalone FTP packages such as WSFTP are commonly used to update HTML files on web servers when uploading revisions to the web server.

*

Biometric Systems :

Biometric also includes the identification of behavioural aspects such as voice, signature or the way a user strikes the keys on a keyboard.

E-commerce is a booming industry where the main concern of every business owner is to provide the maximum level of comfort and security to consumers.
