A Feasibility study is an Analysis that takes all of a project's relevant factors into account - including economic, technical, legal, and scheduling considerations - to ascertain the likelihood of completing the project successfully.

Project managers use feasibility studies to discern the pros and cons of undertaking a project before they invest a lot of time and money into it.

Information System Developing Proposal:-

Let's view the steps in details.

* Write Project Description:-

At this step, you need to collect background information

on your project to write the description.

For Example, your Company needs to increase online sales and promote your products/ services on the web.

2. Describe Possible solution

In order to take step to write a feasibility study Report template, you'll need to perform an "alternatives Analysis" and make a description of Possible Solutions for your project.

3. List Evaluation Criteria

"The Possible Solution of this Project are evaluated and compared by the following Criteria:

- * Concept Spec
- * Content Audit
- * Technical Design Spec
- * Launch Schedule & Time

* Propose the Most feasible solution

Study Report is to determine the most economically reasonable and technically feasible solution.

Write Conclusion

The final step of feasibility reporting process.
