

Ques 1 Why should we use of
Knowledge Instead of Information

As knowledge accounts for the
success of people. The
more knowledgeable you
are, the more advantage
you have over the other
people. The better you
are equipped to manage
yourself & others, the
easier your journey of
life. More than anything
knowledge must be
put to good use.

Information

The role of Information is
to support the key
aspects of running an
organisation, such as
communication, record keeping,
decisions making, data
analysis & more.
