

Q₂ Information req. process modelling.
Explain the info req. analysis.

Ans Information req. process modeling:

Info. Gathering:

A key part of feasibility analysis is gathering information about the present system.

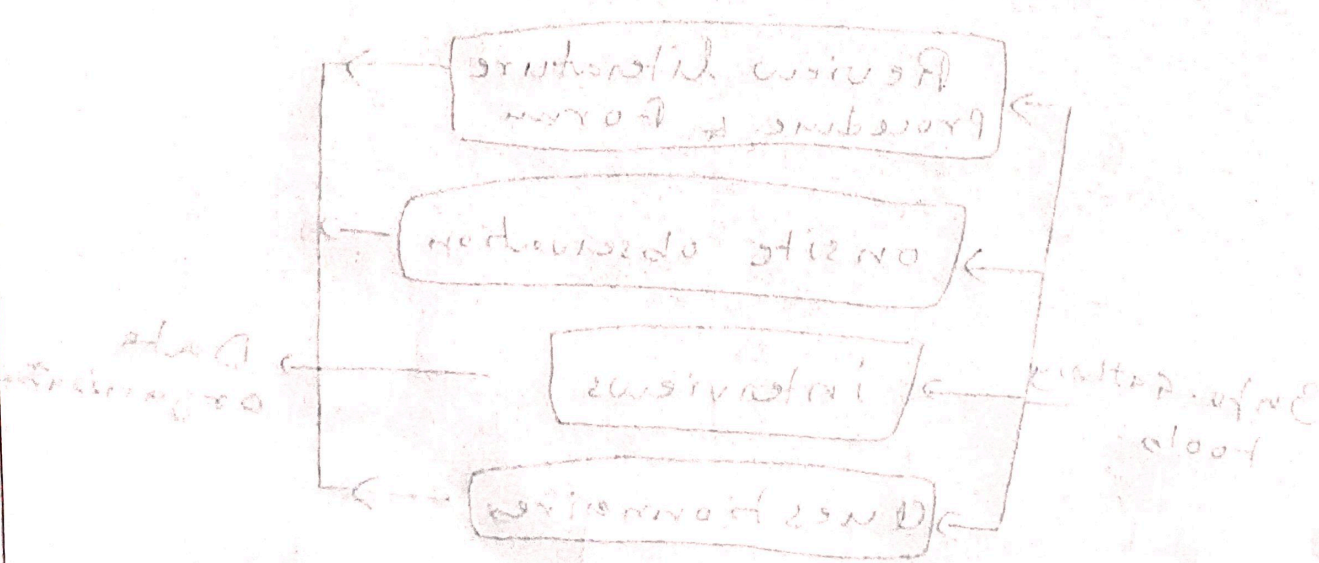

Information gathering is an art & science. The approach and manner in which information is gathered require persons with sensitivity, common sense and knowledge of what to gather & when to gather.

(Information Req. process modelling)

Information Req. Analysis:

It is the process of defining the expectations of the user for an application that is to be built or modified. It involves all tasks that are conducted to identify the needs of different stakeholders.
