Risk Analysis and Feasibility Analysis

- Risk Analysis
Risk Analysis is the process of identifying and analyzing potential issues that could negatively impact key business initiatives or projects. This process is done in order to help organizations avoid or mitigate those risk.

Risk Analysis can help an organization improve its security in a number of ways.

- Feasibility ~~or~~ Analysis
Feasibility Analysis is the process of confirming that a strategy, plan or design is ~~is~~ possible and makes sense. This can be used

to validate assumptions, constraints, decisions, approaches and business cases.

Three major types of feasibility analysis ~~that~~

- Technical Feasibility
- Operational feasibility
- Economic feasibility.

2) Developing a proposal

A proposal development process help organization respond to buyer request for proposals. have an establishment proposal development process should help ensure organization develop the best proposal possible that ~~se~~ satisfied all the buyer needs

and requirement organi-
zations that understand
the customers ~~to~~ procure-
ment process proposal
evaluational methodology
