Section - 3

A (1) Developing information system

They are

follow as.

(1) Initial Phase

It consists of classification of security level and initial risk assessment.

Classification of security level are of three level: low, moderate and high.

(2) Development

In this phase, risks are identified and then analyzed. List out the company's risk area and find out the solution one by one.

3. Implementation phase

This phase contains inspection, integration certification and accreditation.

(4) Operation and maintenance phase

It requires continuous monitoring of the system.

5. Disposition phase

This phase is related to preservation of the information. It also ensures the deleting.

Need of Information System

We need information security to reduce the risk of unauthorized information disclosure, modification and destruction. We need information security to reduce risk to a level that is acceptable to the business. We need information security to ~~know~~ improve the way we do business.
