

Disposal of solid wastes is a stringing and widespread problem in both urban and rural areas in many developed and developing countries.

Municipal solid waste (MSW) collection and disposal is one of the major problems of urban environment in most countries worldwide today. MSW management solution must be financial sustainable, technically feasible socially, legally acceptable and environmentally friendly. Solid waste management issue is the biggest challenge to the authorities of both small and large cities.

Valorization of food organic waste is one of the important current research area. The conventional landfill, incineration composting, & ways of handling solid wastes are common as immature technologies.
