

(3) 2D computer graphics is the computer based

generation of digital images mostly from two dimensional models such as 2D geometric models text and digital images and by techniques specific to them

The word may stand for the branch of computer.

2D computer graphics are mainly used in applications that were originally developed upon traditional printing

Primitive - a person belonging to a primitive or pre-literate non industrial society
reports of travellers and missionaries described contemporary primitives

one who | minutes the . Pure Roman
ancestry

Quadratic surfaces are defined
by quadratic equations in two
dimensional space, spheres and
cones are examples of quadrics.
The quadric surfaces of
pencil man are . Surfaces
of revolution in which
a finite curve in two dime
sions is swept in three
dimensional space about one axis
to create surface
for rotation from a cylinder.
The generalization of line
segment creator.
A hyperboloid by rotating is
always the z axis.
