

Sec-5
Am-2

Communication model :- Are systematic representation the process which helps in which study how communication work can be done.

Model show the process metaphor ally and in symbol

They form general perspective on communication by breaking communication from complex to simple and keeps the component in order

Advantage :-

(i) The primary advantage of digital transmission over analog transmission is noise immunity.

(ii) Digital signals are inherently less susceptible than analog to interface corrupted by noise because it is not
