

Network layer :-

The network layer is responsible for the source to destination delivery of a packet possibly across

multiple network links.

* The network layer ensures that each packet get from its point of origin to its final destination.

to data link layer from data link layer

* Email gateways

A email gateway of an organization is the email server outgoing email passel. These server act as gateways to the email platform of the user organization. An email gateway does not host any user email inbox.
