

There are five types of n/w security -

- (i) Physical security
- (ii) Perimeter protection
- (iii) User training & education
- (iv) Wireless encryption protocol (WEP)
- (v) MAC address filtering.

Firewall Security -

A n/w firewall is similar to firewalls in building construction, because in both cases they are intended to isolate one 'network' from another.

- It is designed to prevent unauthorized access to or a private network.

- It has three types -

- (a) Packet filtering firewall

- (b) State full firewall

- (c) Application aware firewall.
