

2. (a) Communication: → with help of Information technology like instant messaging, emails, voice and video calls becomes quicker, cheaper and much efficient.

Globalization and cultural gap: → by implementing information system we can bring down the linguistic, geographical and some cultural boundaries sharing the information, knowledge, communication and relationship between different countries, languages and cultures becomes much easier.

Availability: → Information System has made it possible for businesses to be open 24 all over the globe. This means that a business can be open anytime anywhere, making purchases from different countries easier and more convenient. It also means that you can have goods delivered right to your doorstep with having to make a single purchase.

Creation of new types of jobs! →
