

A₂ * Process concept → It is an instance of a program in execution. Batch system work in terms of 'jobs'. Many modern process concepts are still expressed in terms of jobs, and two terms are often used interchangeably.

* Critical Sections It is a part of a program which tries to access shared resources. It is not executed by more than one process at the same time. O.S. faces the difficulty in allowing & disallowing the process from entering the critical sections.

Critical Section
