

## Section - 1

Ans-1 Feasibility is defined as the practical extent to which a project can be performed successfully.

For evaluating the feasibility, a feasibility study is conducted that helps in determining whether the system is possible to develop or not.

Types of feasibility study:-

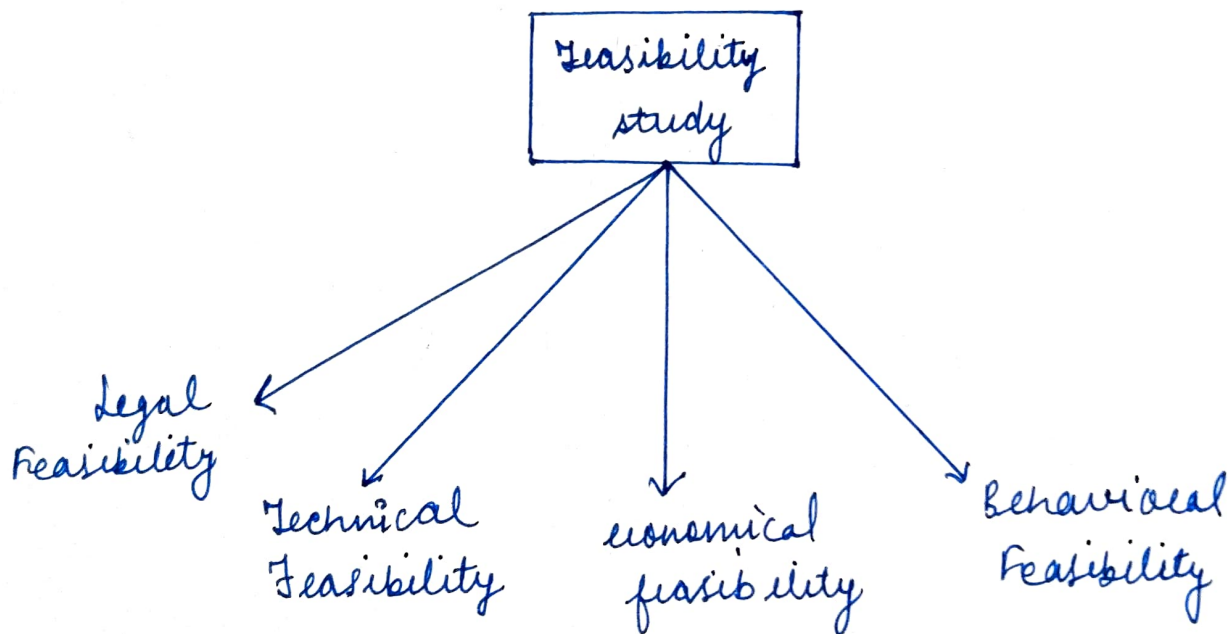

Fig: Types of Feasibility study

- **Technical Feasibility:** Assessing technical feasibility includes evaluating the ability of computer h/w & s/w to handle workloads adequately.
- **Economic Feasibility:** Economic feasibility determines whether the required software is capable of generating financial gains.
- **Behavioural Feasibility:** It checks whether the employees in the business will use it or not.
