

Section-1

Ans 3 Harmony in Nature

The aggregate of all the mutually interacting units - big or small, sentient or insentient together can be called nature. These units are infinite in number and we could easily observe that there exists a dynamic balance, self regulation among all these units. This self regulation is harmony or balance in nature. The law of nature has a unique cause and effect system which must be understood in order to be in harmony with the natural law of things.

Natural harmony is necessary for the following reasons:

- * Natural harmony is necessary to solve the problem of global warming and depletion of non-renewable natural resource can be avoided.
- * Natural harmony with trees cure all problems like - reduction of wild velocity, energy savings, doing companion planting, development of an eco-subsystem in terms of establishing a forest garden, reduction of building heat.

- * It is possible to achieve natural harmony in the establishment, maintenance and management of educational institution like schools, colleges and universities.
- * One can understand the depths of harmony and alignment in natural by contemplating and reflecting upon the natural order. It is possible to unravel the mystery of the natural synthesis in the midst of ongoing chaos at the material plane.
