

## Sec-5

Ques 1. Explain four order existing in nature?  
How are they interlinked to one another?

Ans 1. There are four order in nature material order, plant/bio order, animal order and human order.

There are recyclability and self-regulation in nature.

Material order :- Material order means the judgements order and decisions, if any, identified to be by each selling shareholder as being relevant to his, her or its interest in or ability to transfer plant/bio order :-

The plant and bio order is food and the plant and bio order is provided food for animal, birds and fishes.

Animal order :- Animal order Animal, birds etc. Animal order helps enrich the soil with its excreta and these can help plant with nutrients. The animal order is the best for order.

Human order :- The human are the smallest order and they

Financial values are most important in life - so important that people are and shall be ready to sacrifice almost anything to live with their values. Honesty, integrity, love.
