

## Section - 5

Q1.

```
"WELCOME"
```

```
print("WELCOME")
```

Output = 7

There are many ways to create string in Python  
Some ways are described below:-

Sol 1.

```
S = "WELCOME"
```

```
S1 = " IN BITS"
```

```
S2 = S + S1
```

```
print(S2)
```

Output

WELCOME IN BITS

Sol 2.

```
S2 = S + S1, (concat (S, S1))
```

```
print(S2)
```

Output

WELCOME IN BITS
