

## Section-2

Answer 1-

- (i) The Subject that enables us to understand 'what is valuable' for human happiness is called value education.
- (ii) The present education system has become largely skill-based.
- (iii) The prime emphasis is on science & technology. However, science & technology can only help to provide the mean to achieve what is considered value.
- (iv) It is not within the scope of science & technology to provide the competence of deciding what really is valuable.
- (v) Value education is a crucial missing link in the present education system.

If you want to understand what is the importance of ethics first we should understand what is ethics. Professional ethics is defined as the personal and corporate rules that govern behaviour with the context of a particular profession and value of education builds the quality of professional ethics in human being.
