

## Section 5.

Question 1. Explain how orders existing in nature? How are they interlinked to one another?

Answer These are how orders in nature material order plant / his order, animal order and human order.

There are recognizability and self-regulation in nature! -

Material order :- Material order means the judgements order and excess, if any identified us by each selling share holder as belief solvent to his / her or its interest in or ability to transfer

Plant / bio order :- The plant and bio order is that the plant and bio order is provided how animal, fish and bird

Animal order:- Animal order animal birds etc.

Animal order helps enrich the soil with its excreta and these end help plant with nutrients. The animal order is best for harmony.

Human order :- The human are the smallest order and they are referred to as humans order. Further inequality

Human value are most important in life. so important that people are ready to sacrifice any thing to live with their values
