Section - 5

Q1 Explain four orders existing in nature? How are they interlinked to one another?

Ans Harmony in nature our world today may be described as an age of confusion and tension, both within the outside of us. A beautiful life is one that is in harmony with the situations in life. In fact Harmony is a precious treasure of human life. Real success, satisfaction & happiness are different facets of harmony. If one is to enjoy the benefit of life to the fullest, it is necessary to develop & maintain harmony. The law of nature has a unique cause & effect system which must be understood in order to be in harmony with the natural law of things. Natural harmony is necessary for the following. Natural harmony is necessary to solve the problems of global warming & depletion of non-renewable natural source can be avoided.

1) All the physical objects that are in solid, liquid or gas state either living or non-living, collectively termed as nature in other words, the aggregate of all the mutually interacting units - big or small, distinct or indistinct together can be called nature.

(ii) Material order the big land mass of the continents, gigantic water bodies like oceans and seas, mountains & rivers, the atmosphere above the heaps of metals & mineral below.

(iii) Each one of us can recognize all these four orders round ourselves & see that together these four orders comprise of all the units that we see & understand around us. The four orders as above should not be viewed in isolation.

(iv) Interconnection & mutual fulfillment in nature mutual fulfillment implies that each unit of the four orders is related to each other & existing to each other.

4. They are interlinked to one another, we thus see that the above orders besides the human order are in harmony & are fulfilling to the human order. We have not even understood our own needs properly.
