Section - 3

Q3 Comment on 'Physical facilities are necessary but not complete for human being but physical facilities are necessary & complete for animals.'

Ans: Physical facilities are necessary & complete for animals, while they are necessary but not complete for humans. It is easy to verify.

1. for Animals :- Animals need physical things to survive, mainly for the case of their body. For example, cows will look for food when it is hungry. and it gets the grass on fields. It eats it, sits around the cow at dinner. Here we can say that a dog or any animal has physical things, they are largely fine. They don't desire other things like knowledge on a peaceful animal society or getting a good MBA.

2. for Humans :- While physical facilities are necessary for human being, they are not complete by themselves for fulfilling our needs. Our needs
