### Section - I

Q3

Ans • The aggregate of all the mutually interacting units - big or small, sentient or insentient together can be called nature.

- These units are infinite in no. and we could easily observe that there exists a dynamics balance, self regulation among all these units.
- This self regulation is harmony or balance in nature. The law of nature has a unique cause and effect system which must be understood in order to be in harmony with the natural law of things.

\* Natural Harmony is necessary for the following reasons :-

- Natural harmony is necessary to solve the problem of global warming & depletion of non-renewable natural resource can be avoided.
- Natural harmony with trees cure all problem like - reduction of wind velocity, energy saving, doing companion planting, development of an eco-subsystem in terms of establishing a forest garden, reduction

--- continues

of building heat.

- It is possible to achieve natural harmony in the establishment, maintenance & management of educational institution like schools, college & universities.
- One can understand the depths of harmony and alignment in nature by contemplation & reflecting upon the natural order. It is possible to unravel the mystery of the natural synthesis in the midst of ongoing chaos at the material plane.
