

Question No-9]

=> Project life cycle

Although the numbers of phase and their significance are project specific but these are following phases

① Conception phase - This is the very first phase of a project in which the idea of the project is visualised. As an old saying goes

② Definition Phase: - During this phase, the conceived idea is given a concrete shape with regard to availability of resource, marketability of new products.

③ Planning and Organising phase -> In theory, this phase should come subsequent to the definition phase starts much before.
