

[Sec - 5]

* What is value education.

* Activities which are effective, competent and useful from educational perspective are equivalent to the value education. This value education is also regarded as value in education or educational value.

- The sense of identifying wrong and right is referred to as value education.

Following are the two important approaches of imparting value education.

① Explicit value Education. It is related with several techniques, system and practices of teaching used by teachers or trainers.

② Implicit value Education, includes value factors of education experience, which develop value-oriented.

* Importance of value Education

① Safeguard value - Deterioration of value is observed in various religions, social, political, economic and culture areas.

② Reduce violence - Today's young generation lives a carefree life. The existing Indian society is indulged in violence and bribery.

③ Social Indifference - In the twenty first century people are egocentric and are not bothered about other people.
