

[Sec-2]

Q2 What is strike price?

A) Strike price -

A strike price is the set price at which a derivative contract can be bought or sold. When it is exercised,

For call option, the strike price is where the security can be bought by the option holder. For put the strike price is the price at which the security can be sold.

Strike price also known as exercise price or grant price is a key concept for derivative. The strike price is the price that the underlying asset referenced in a future or option contract must achieve in order for the holder to execute the contract.
