- Social entrepreneurs

- Increasing the level of productivity entrepreneurship education and development help the individual level of productivity increase

which helps the organisation achieve more long-term goal. The findings clearly indicate that there is casual linkage between entrepreneurial education (managerial skills), social competence (interpersonal skills) and to a greater degree basic entrepreneurial training skills and ventures effectiveness. Nowadays entrepreneurship is considered as a growth and development force of organisations and societies:

Therefore world great university have taken education and developement of entrepreneurship thinking into account in their's curricula, and developing entrepreneurship skills.
