

Q Harmony in the nature why is it important? Explain with examp

→ A part from human creations, all the entities present on the planet Earth like plant animals, landscapes including mountains, oceans, glaciers, deserts etc. & other significant element constitute to form a physical environment, which is called 'Nature'.

→ Everything else, that man did build is nature. The term nature is derived from the latin word "natura". Hence, the definition of nature does not involve anything made by humans.
