

Explain four orders existing in nature. How are they interlinked to one another?

→ Definition of Nature: all the physical objects that are in solid, liquid or gas state either living or non living, collectively termed as nature. In other words, the aggregate of all the mutually interacting units - big or small there exist a dynamic balance.

→ Material order: The big land mass of the continents, gigantic water water bodies like ocean.

→ Each one of us can recognize all these four orders around ourselves and see that together these four orders around ourselves and see that together these four orders comprise of all units.

→ Interconnectedness and mutual fulfillment in nature implies that each unit of the four orders are fulfilling.
