

Q9 → Define the economic Planning.
Also define term Productivity.

Ans → Economic Planning is a "resources" allocation system in which the government makes economic decision based on an economic Plan. Planning is a mechanism for the allocation of resources between and within organization contrasted with the market mechanism. As an allocation mechanism for socialism, economic Planning replace factor market with a produce for direct allocation of resources within a interconnected group, as socially owned organized which comprise the productive apparatus of the economy.

There are various forms of economic Planning that vary based on their specific procedure and approach. The level of centralization in decision making depends on the specific type of Planning mechanism employed.

Productivity describe various measure of the efficiency of production.

Productivity strategies.

- Eliminate Time wasting Activities: by using the Eisenhower base
