

5) Cultural diversity

Cultural diversity is the quality of diverse or different culture, as apposed to monoculture, the global monoculture, or a homogenization of cultures, akin to cultural decay. The phrase cultural diversity can also refer to having different cultures respect each other's differences. The Phrase "cultural diversity" is also sometimes used to mean the variety of human societies or cultures in a specific region, or in the world as a whole.

Globalisation is often said to have a negative effect on the world's cultural diversity.

Culture is that which shapes us; it shapes our identity and influences our behaviour. Culture is our "way of being", more specifically, it refers to shaped language, beliefs, values, norms, behaviour, and material objects that are passed down from one generation to the next.
