

## Q4 Problem of Sugar Industry in India -

Sugar can be produced from Sugar cane, sugar-beet or any other crop having sugar content, but in India sugarcane is the main source of sugar. At present this is the second largest agro-based industry of India after cotton textile industry.

India is the world's largest producer of sugarcane and second largest producer of sugar after Cuba. But India becomes the largest producer.

### # Growth and development & problems

India has a long tradition of manufacturing sugar. References of sugar making by the Indians are found even in the Atharva. There are low yield of sugarcane, low rate of recovery, high cost of production, small and un-economic size of mills etc.
