

## (6.) Problem of Cotton Textile Industry:

Scarcity of Raw Cotton: India's Cotton Textile Industry suffered a lot as result of partition because most of the long staple Cotton growing area went to Pakistan.

- ) obsolete machinery
- ) Erratic Power Supply
- ) Low Productivity of Labour
- ) Stiff Competition
- ) Sick Mills

•) four major problems faced by Cotton textile mills in India:

• They yarn in India is a produced by small industries and unit which largely cater to local markets.

• most of the machinery installed in Cotton mills are outdated and need to be replaced

• Irregular power supply has hampered

• The Cotton Industry is facing tough competition from the fibre industry.
