

Section-2

Q.1 Give the definition of Personality.
- Explain determinants of Personality

Ans Personality is defined as the characteristic sets of behaviours, cognitions and emotional patterns that evolve from biological and environmental factors. While there is no generally agreed upon definition of Personality, most theories focus on motivation and psychological interactions with one's environment. One the other hand, more behaviourally-based ones define Personality through learning and habits. Nevertheless, most theories view Personality as relatively stable.

* determinants of Personality

Personality is not determined by a single factor; but by an accumulation of many factors. Some of those factors are Psychological while others are Physical biological and hereditary. I have compiled some of the most influential factors when it comes to determinants of Personality.

* culture and Religion - The culture in which one lives almost always involves.

- Traditional Practices
- Norms
- customs
- Procedures
- Rules and Regulations
- Precedents
- values
