

## Section-4

Ques 1

Ans: 1

The perceptual process begins with receiving stimuli from the environment and ends with our experienced reality one at a time in what is called multi-stable perception.

Ques 2

What is perception its process?

Perception is an intellectual process of transforming sensory stimuli to meaningful information.

It is the process of interpreting something that we see or hear in our mind and use it later to judge and give a verdict on a situation person group etc.

Ques 3 What is perception with example.

We perceive in sentence. When perception is awareness, comprehension or understanding of something.

An example:- perception of knowing  
a difference between when to try  
a student to increase  
them.

→ What is perception and types:-

perception refers to the set of  
processes we use to  
make sense of differences  
stimuli based on how we  
are presented with.

→ What are the two types of perception

There is sensory perception - then  
there is spatial perception  
and then is your own

understanding - how you receive  
the information. and that  
one is different - in  
each and every human being.

→ What are the elements of perception  
perception includes the five senses: touch  
sight, sound, smell and taste.
