

2:-

NPV:-

NPV stands for Net Present Value it applies to a series of cash flows occurring at different times. The present value of a cash flow depends on the interval of time between now and the cash flow as a whole.

IRR:-

IRR stands for Internal rate of return it is a measure of an investment's expected future rate of return. As the IRR is an estimate of a future annual rate of return. IRR should not be confused with the actual achieved investment return of an historical investment.

~~CORP~~

CORPORATE FINANCIAL MANAGEMENT

It is the area of finance that deals with sources of funding, the capital structure of corporations, the actions that managers take to increase the value of the firm to the shareholders, and the tools and analysis used to allocate financial resources.

Time value of Money:- It is

a concept that money you have now is worth more than the identical sum in future due to its potential earning capacity. This core principle of finance holds that provided money can earn interest, any amount of money is worth more the sooner it is received.
