

Q 2 → Define research problem? Explain the steps involved in defining and formulating a research problem

Ans → Research problem:- A problem is an interrogative sentence or statement that asks what relation exists between two or more variables. The answer to question will provide what is being sought in the research.

There are the following steps.

Step 1 :- Identify the problem

Step 2 :- Review the literature

Step 3 :- Clarify the problem

Step 4 :- Clearly define terms and concepts

Step 5 :- Define the population

Step 6 :- Develop the instrumentation plan

Step 7 :- Collect data

Step 8 :- Analyse the data
