

Section - 5

Q. 1 -> Discuss the factors affecting productivity? Define the productivity measurement?

Ans -> Following factors affect the productivity:

- 1. ① Technological development
- 2. ② Individual factors
- 3. ③ Organizational factors
- 4. ④ Work Environment

Productivity - Production is a systematic activity to convert raw materials into finished products which have higher value.

$$\text{Productivity} = \frac{\text{Output}}{\text{Input}}$$
