

Section-5

Q1. Coefficient of Standard deviation:-

The Coefficient of variation represent the ratio of the Standard deviation to the mean, and it is a useful statistic for comparing the degree of variation from one data series to another, even if the means are drastically different from one another.

* Guidelines for report:-

- Know your Purpose.
- Know your readers.
- Know your objective.
- Choose an approach.
- Decide on structure.
- Use the right style.
- Consider layout.
- Leave time to refine.
