

Ques.2 Explain the various types of error?

Ans An error is something you have done which is considered to be incorrect or wrong, or which should not to have been done.

Type of error:-

There are 3 types of error

- syntax error
- logical error (semantic error)
- run-time error

• Syntax error-

violation of any grammatical rules causes syntax errors.

- Run-time error- The run time error dividing a no by zero, array indices out of bounds, arithmetic errors like square root of negative no, range error & other input error.
