

Ques-2 What do you understand by right to information Act. Discuss its advantages & disadvantages of it.

As

RTI stands for Right to information. This was passed as an independent Act by Indian government in the year 2005.

This is right provided or empowered to the people of our nation or to a much better extent the consumers and customers of our nation by the government using which they can write to a government body or public authority and ~~ask~~ ask for having the correct information about any product, service or any related activity and the same has to be answered within 30 working days.

## • Advantages of RTI -

- (i) Empowerment of the common man - The entire range of common man in the nation has been empowered by such an initiative in which they have got the full right to be informed about anything.
- (ii) Easy mode of spreading information rightfully - The RTI has incubated the very concrete and easy mode of spreading information of all kind in the form.
- (iii) Protection of information - Since, the selected people with selected queries will be entertained and informed rightfully and adapt aptly, so this will lead to protection of information there by protecting everyone from being wrongly.

## Disadvantages of RTI -

① Unnecessary chaos all over -

It is a fact that this immensely populated nation and this is that the habit to create unnecessary disturbance and chaos over a newly incorporated plan just to create nuisance.

② An extra burden to authorities -  
Since

the authority persons are already having loads of work and tasks to be delivered at their end and after this new act passed.

③ Multiple public information officers - (PIO) -

The govt has appointed multiple PIO's. This result in running of citizens from office in search of correct PIO who can yield correct information.
