

Section-5.

Q.1
Ans

Coefficient of variation represents the ratio of the standard deviation to the mean, and it is a useful statistic for comparing the degree of variation from one data series to another, even if the means are drastically different from one another.

* Guidelines for writing a report are as follows:-

i Title - This part should be short and precise manner.

ii Abstract - it is a self-contained summary of the whole of your report.

iii Introduction - sets the scene for your reports it does to give good impression.
